Genie Docs

Intro

Genie is a **rule-based** bot built in python. It's a helpful **desktop application** for everyone who wants to do simple things quickly like download a file, minify, etc.,

Installation

just click download v1.0.0. button in readme,
Simply follow the instructions to install successfully

Download
v1.0.0

Note: supported platforms - windows 7 / 8 / 10 / 11

List Of Genie's

minify css [file path]
download npm page [package name]
get hashtag [insta hashtag]
give me goldenratio typeface

create random text
generate dummy [visa or master] card
make 12 grid
validate email [email address]
download npm pkg [package name] [version]

Identify parts of Genie patterns

Using colors is the best way to identify the parts for genie commands :)

Command **Target**

minify css D:/project/style.css

Just find your CSS file on the path you are given, It's minified your CSS in one line and save as a .css file

art.txt

download npm page chamy

find your package name on the npm site and download your package webpage as HTML

chamy.html

get hashtag art

it will collect all hashtags based by art and store it as a text file

art.txt

give me goldenratio typeface

it will generate a typograph scale based by golden ratio

typography.html

create random text

Generate a random text for you and store it as a text file which is useful for some other purpose like email verification, passwords

randomtext.txt

generate dummy visa card
generate dummy master card

Note: it's fixed target visa and master, you can't use another card type

Generate dummy card numbers for validation & you can use them to validate your forms.

dummyvisa.txt   dummymaster.txt

make 12 grid

Generate a grid-based system of 12 columns and save it as CSS file

12gd.css

validate email genie@example.com

Validate your email based on patterns and checks for vendor is valid or not

genie@example.com..txt

download npm pkg chamy 1.2.0

Find your package on the npm site to download the entire package name with a version that you entered, it's saves as a zip file

chamy-1.2.0.zip
